

RAILWAY SAFETY PROTOCOL DOCUMENT

Department: Safety & Compliance

Document ID: RS-2024-001

Date: January 15, 2024

CRITICAL SAFETY PROCEDURES

1. EMERGENCY PROTOCOLS

All railway personnel must be familiar with emergency evacuation procedures.
Contact emergency services immediately in case of accidents.
Follow the STOP protocol: Stop, Think, Observe, Proceed.

2. MAINTENANCE REQUIREMENTS

Daily inspection of rolling stock is mandatory.
Weekly track inspection must be completed by certified engineers.
Monthly safety audit of all equipment is required.

3. COMPLIANCE STANDARDS

All operations must comply with FRA regulations.
Safety training must be completed annually by all staff.
Documentation of all safety procedures must be maintained.

4. RISK ASSESSMENT

High-risk areas include: platform edges, track crossings, maintenance zones.
Regular risk assessment updates are required quarterly.
Immediate reporting of hazards is mandatory.

5. TRAINING REQUIREMENTS

New employees must complete 40-hour safety training.
Refresher courses required every 6 months.
Certification must be renewed annually.
